

NED University of Engineering and Technology, Karachi

**DEPARTMENT OF COMPUTER SCIENCE &
INFORMATION TECHNOLOGY**

April 14, 2024

I am pleased to be writing this letter of recommendation for Ms. Qunoot Ahmed. It is satisfying to know that a student of her potential is moving towards culmination of her career goals.

This is for the information of all concerned that Ms. Qunoot remained a student of Batch 2010-2011 at NED Engineering University Karachi while pursuing her undergraduate Bachelor of Computer Science and Information Technology program. Since I had the privilege of conducting various courses in BCIT, that included courses of Discrete Structures and Artificial Intelligence and Expert Systems. I found her very sharp and keen in attendance earning above-average grades in the class. Through her industrious and intelligent abilities, Qunoot remained an outstanding student and as per my assessment her performance, throughout her stay with the institution, can confidently be graded as academically superior.

During her stay at the Institution, she has shown immense interest and skills in all the selected fields of studies. In all the courses, various assignments related to discrete structure problems and artificial intelligence were successfully tackled and submitted which helped her in achieving distinctive grades. In her Artificial Intelligence course, she built a Face detector for crime identification.

As a person, she is a great communicator and always willing to assist fellow students. She takes ownership of the assigned work. I am proud of her multi-tasking skills, how she is working in a software house and studying at the same time. She is a real hard worker who is motivated enough to deal with every challenge that comes in her path. As her teacher and mentor, I feel an honor to gladly recommend her reference for higher studies in any university of her choice. I shall always remain available for any further queries at the personal information appended below.

Regards,

Dr. Najeed Ahmed Khan,
Professor,
Department of Computer Science and Information Technology,
NED University of Engineering and Technology
Karachi.
